

# Training on advanced cell culture and data management systems

Get familiar with **organ on a chip** technology and learn how ***in vitro* & *in silico* data integration** can enhance your research!

- Overview of 3Rs, FAIR data principles, risk assessment and new types of *in vitro* systems;
- Hands-on training on **Quasi Vivo®** interconnected cell culture flow system engineered to provide *in vivo*-like conditions for cell growth;
- Learn how to prepare your harmonised data templates according to best practices and use **DC DataExplorer** interface to optimise the data for computational modelling.

Joint workshop by

douglasconnect  
working communities

Kirkstall

**7 - 8 February 2019, Technology Park Basel**

Hochbergerstrasse 60C, Basel, Switzerland
